

## Streamline & Enhance Regulatory Business Processes

Whether it is licenses, permits, certificates, registrations, or other types of credentials, the MyLicense® Suite of products supports the essential activities and business processes that government agencies require for industry oversight and public protection.

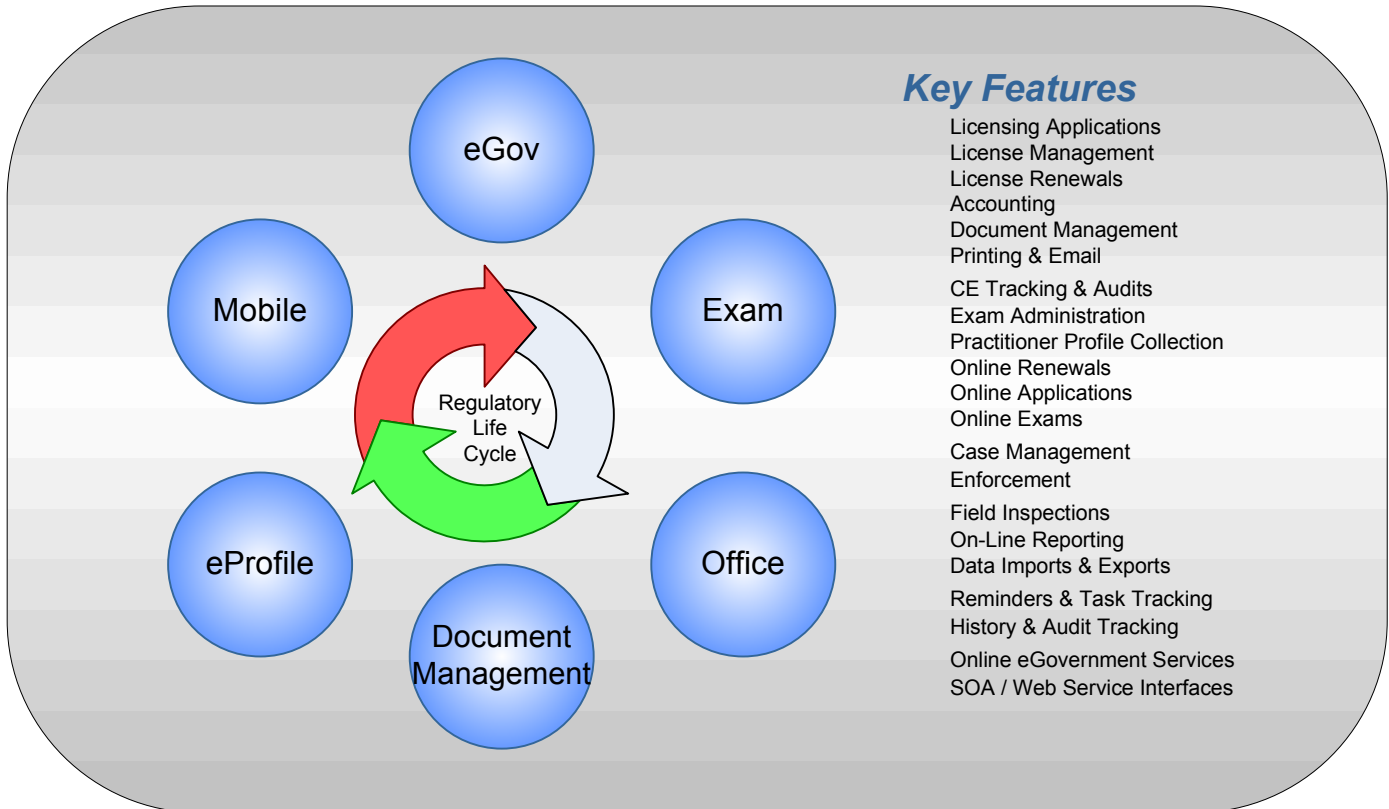

System Automation's integrated solution provides clients with the following tangible results:

- Streamline the licensing and enforcement process
- Provide greater public access to government services
- Increase public safety
- Provide transaction security and employee accountability
- Improve response time to legislative and administrative changes
- Improve data consistency and reliability
- Provide valuable management reports and decision support
- Reduce agency costs

The MyLicense Suite is a comprehensive solution that provides government agencies with the tools and flexibility required for efficient and effective regulatory oversight of a broad range of industries.
